6. Review of CVPC NP

The Chairman explained where matters stood with the final version. RH said he was unhappy at the "weak" environment information. PK said the evidence would be in the appendices and the main document was generic. RH wanted to have more input – discussion took place as to what was a local green space and an open space. PK said these were areas within the settlement boundary. PK confirmed that there would be a glossary for the acronyms.

ACTION: PK

RH agreed to highlight his views on environment issues and deliver these to PK before the end of this week. PK said if there was content which he considered a "burning platform" then he would address them.

7. Future consultations

It is important that the public consultation on the NP does not clash with the Hart LP which goes out in March. The Parish Newsletter (Issue 16 Oct 2015) format for the introduction of the start of the NP process was the suggested way forward.

ACTION: PK to speak to Cllr. Jackson.

None. The meeting closed at 8.47pm.
